CORE COMPETENCIES

Analytics Engineering

Kimball Modeling
Star/Snowflake Schema
Data Marts
Semantic Layers
dbt Architecture
Data Contracts
Governance
Metadata Mgmt

GCP

BigQuery
Cloud Composer
Dataflow
Pub/Sub
Dataproc
Cloud Storage
Data Catalog
Cloud Monitoring

Orchestration & ELT

Airflow
dbt Cloud
CI/CD
GitHub Actions

Programming

SQL
Python
Bash

Cloud & DevOps

GCP
Terraform
Docker
Kubernetes

BI & Analytics

Looker
Power BI
Tableau
Plotly

EDUCATION

Catholic University of East Africa

Bachelor of Commerce
Second Class Honours
Aug 2016 – Aug 2021 · Nairobi, Kenya

Strathmore School

KCSE — Grade: B+
Jan 2012 – Nov 2015 · Nairobi, Kenya

CERTIFICATES

Certified Mobile Developer

Strathmore University · Mar-Jun 2016

DEL F A2 Certificate

Alliance Française · Jan-Feb 2014

SUMMARY

Senior Analytics Engineer with 5+ years of experience designing and scaling cloud-native analytics platforms supporting enterprise reporting, self-service analytics, operational decision-making, and machine learning workloads.

Expert in dimensional modeling, dbt transformation frameworks, data warehouse architecture, Airflow orchestration, data governance, and analytics enablement. Proven track record delivering trusted data products across Finance, Supply Chain, Marketing, Sales, and Operations domains while reducing platform costs and improving data reliability.

Specialized in BigQuery, Snowflake, dbt, Airflow, Python, SQL, and modern DataOps practices.

WORK EXPERIENCE

Safal Group

Nairobi, Kenya

Senior Analytics Engineer

Sep 2024 - Present

- Data Warehousing:** Designed and implemented data warehousing solutions, reducing data retrieval times by 50% using SSIS, BigQuery, and Snowflake.
- Data Completeness & Accuracy:** Implemented null checks, record reconciliation, referential integrity enforcement, range constraints, and format validations across pipelines, improving data accuracy by ~98% and reducing missing values by 40%.
- Workflow Management:** Conducted ETL/ELT processes with large datasets and handled DAG data dependencies using Airflow averaging 10TB/day, improving processing efficiency by 20%.
- Programming:** Utilized Python, SQL & Shell scripting for data manipulation, analysis, and modeling, contributing to a 10% improvement in code accuracy while ensuring QA & CI/CD best practices.
- Automation:** Automated data workflows and ETL pipelines using Apache Airflow and dbt, cutting manual data processing time by 60%.
- BI Engineering:** Built and maintained 150+ interactive dashboards using Looker, D3.js & Plotly, providing real-time insights to stakeholders and executives.
- Automated Data Quality Controls:** Integrated data validation frameworks and transformation-level testing into enterprise pipelines, improving reliability and reducing manual QA effort by 70%.
- Data Migration:** Led migration of on-premises Hadoop and Spark workloads to modern cloud platforms via lift-and-shift and modernization strategies, enhancing performance by 35% and reducing operational costs by 20%.
- Training & Documentation:** Conducted 10 BI training sessions and created detailed documentation, resulting in a 20% increase in user adoption of BI tools.
- Statistical Testing:** Performed A/B testing and statistical analysis using Google Optimize and Google Analytics, boosting the effectiveness of business initiatives by 18%.
- Machine Learning:** Developed custom ML algorithms using Python and TensorFlow, achieving up to 90% accuracy on classification tasks through cross-validation and grid search optimization.
- Cloud Optimization:** Architected scalable data processing prototypes using Google Cloud Dataflow, ensuring high availability and fault tolerance with an average iteration time of 1.5 weeks.

Davis & Shirtiliff

Nairobi, Kenya

Analytics Engineer

Jan 2023 - Aug 2024

- Consistency & Validation:** Enforced primary key uniqueness, reconciled metrics across datasets, aligned units of measure, and validated SCD structures, eliminating 99% of duplicate business keys.
- Freshness & Timeliness Monitoring:** Automated latency tracking, event watermark checks, and ingestion delay alerts, reducing data delivery SLA breaches by 85%.
- Schema, Metadata & Compliance:** Detected schema drift, enforced data type standards, validated PII masking, and maintained full data lineage, ensuring 100% compliance with internal governance.
- Data Visualization:** Created and maintained interactive dashboards using Looker, Power BI, and Tableau, improving stakeholder engagement by 25%.
- Campaign Tracking:** Collaborated with marketing teams to deliver data-driven solutions, improving marketing campaign ROI by 30%.
- Performance Optimization:** Refined SQL queries and stored procedures, reducing data retrieval time by 40%.
- Data Modeling:** Assisted in designing and implementing data models and database schemas, increasing query performance by 35%.
- Reporting:** Provided regular reports and ad-hoc analysis, supporting business functions and leading to a 10% reduction in operational costs.
- Stakeholder Support:** Presented findings and recommendations to senior management, contributing to a 12% increase in revenue through data-driven decision-making.
- Cross-Department Collaboration:** Collaborated with Sales Engineers and Inventory Managers to design and deploy predictive models that improved sales projections & supply chain optimization by 15%.

Grande Afrique Consulting

Nairobi, Kenya

Data Analytics Associate

Nov 2020 - Nov 2022

- Data Analysis:** Supported senior analysts in collecting, analyzing, and interpreting large datasets, contributing to a 10% increase in project efficiency.
- SQL Development:** Developed SQL queries to retrieve and analyze data, improving data accessibility by 25%.
- Reporting:** Created Excel-based reports and visualizations, enhancing data presentation and clarity by 20%.
- Data Validation:** Conducted data validation and cleansing, ensuring data accuracy and reducing errors by 15%.
- Support:** Assisted in preparing detailed reports and presentations for management, supporting strategic decisions and improving communication by 18%.
- Team Contribution:** Participated in team meetings and contributed to developing data analysis strategies, leading to a 10% improvement in team performance.
